#### A.1 Glossary

Term	Definition
Alpha Coal Project (Mine) or the Project	Proposed 30 Mtpa open cut coal mine located within the Galilee basin on MLA 70426
Alpha Coal Project (Rail) or the Project	Railway corridor running from the rail loop at the Alpha Coal Project (Mine) to the loud-out facility at Abbot Point Port
Background	6km – 16km - Textures are no longer visible, but mountain and valley forms, skylines and ridgelines are important (Forest Practice Board Tasmania, 2006)
Ballast	Railway substrate used to support sleepers and track.
Below ground forest/vegetation biomass	The entire biomass of all live roots
Burra Charter	The Australia ICOMOS Charter for the Places of Cultural Significance (1999)
Converge	Converge Heritage + Community
Cumulative impact	The interaction of impacts arising from a development in conjunction with other past, present and reasonably foreseeable future actions
Debris	Largely intact dead plant material that is not part of the soil and that has not broken down to become mulch.
Foreground	0-1 km – Is the visual zone where colour contrast and textural detail are most clearly perceived (Forest Practice Board Tasmania, 2006)
Landscape feature	A component, part or feature of the landscape that is prominent or eye-catching, e.g. hills, buildings, vegetation
Landscape quality	Largely subjective judgement based on particular characteristics that influence the way in which the environment is experienced, including special interests such as cultural associations or heritage interests, the presence and/or type of elements and condition
Landscape sensitivity	The extent to which landscape can accept a change of a particular type and scale without unacceptable adverse impacts on its character
Landscape value	Areas of formally designated landscape that through national or local consensus, reflect the value placed by society on particular environments and/or their features
Line source	A class of source (s) in air dispersion modelling with an elongated geometry such as a road or other transport corridor.
Maximum above ground biomass	The aboveground biomass is the combined mass (in tdm/ha) of the aboveground plant components for trees (stems, branches, bark, and leaves) and for crops (grains, buds, fruit, stalks, and leaves). It does not include the roots, or any debris or mulch or soil matter. It is a mass, measured in tonnes per hectare of dry matter, not carbon mass.
Middleground	1km-6km – Different elements in the landscape are visually apparent (Forest Practice Board Tasmania, 2006)

Alpha Coal Project Supplementary Environmental Impact Statement | VOL 2 2011 APPENDICES

#### Mitigation Measures, including any process, activity or design to avoid, reduce, remedy or compensate for adverse landscape and visual impacts of a development project Residual impact An impact that occurs/persists after mitigation measures have been put in place Residential areas and zones involving the presence of the individual people for extended Sensitive visual periods except in the course of their employment and recreation. receptor or locations The EIS Alpha Coal Project Environmental Impact Statement The Proponent Hancock Prospecting Pty Ltd Visual amenity The value of a particular area or view in terms of what is seen Visual catchment Extent of potential visibility to or from a specific area, feature or proposal Visual impact Changes in the appearance of the landscape or in the composition of available views as a result of development, to people's responses to these changes, and to the overall impacts in regard to visual amenity. This can be positive (i.e. beneficial or an improvement) or negative (i.e. adverse or a detraction). ZN	Coaly Mudstone

#### A.3 Units

Unit	Definition
%	Percent
<	Less than
>	Greater than
μg/L	Micrograms per litre
µg/m <sup>3</sup>	Micrograms (one-millionth of a gram) per cubic meter air

#### HANCOCK PROSPECTING PTY LTD Alpha Coal Project Supplementary Environmental Impact Statement | VOL 2 2011 APPENDICES

µS/cm	Microsiemens per centimetre
°C	Degrees Celsius
bcm	Bank cubic metres
Bt	Billion tonnes
CCIS	Climate Change Impact Statement
CH <sub>4</sub>	Methane
Cm	Centimetre(s)
dB	Decibels
dB(A)	Unit used to measure 'A-weighted' sound pressure levels
dS/m	Deci-Siemens per metre
DWT	Dry Weight Tonnage
G	Giga
g/m <sup>2</sup> /month	Gram per square metre per month
g/m <sup>3</sup>	Grams per cubic metre
ha	Hectare(s)
hp	Horse power
Hz	Hertz
к	Hydraulic Conductivity
kg	Kilogram
kg/ha	Kilogram per hectare
kHz	Kilohertz
kL	Kilolitres
kL/day	Kilolitres per day
km	Kilometre(s)
km/h	Kilometres per hour
km <sup>2</sup>	Square kilometre
Kph	Kilometres per hour
kt	Kilotonne
kV	Kilovolt
kVA	Kilovolt-ampere
L	Litres
L/s	Litres per second
l/sec	Litres per second

L/yr	Litres per year
L <sub>A10</sub> (1 hour)	The LA10 level measured over a 1-hour period.
L <sub>A10</sub> (18 hour)	The arithmetic average of the LA10 levels for the 18-hour period between 0600 and 2400 hours on a normal working day. It is a common traffic noise descriptor.
L <sub>A10</sub> (Time)	The sound pressure level that is exceeded for 10% of the time for which the given sound is measured.
L <sub>A90</sub> (Time)	The A-weighted sound pressure level that is exceeded for 90 per cent of the time over which a given sound is measured. This is considered to represent the background noise e.g. LA90 (15 min)
L <sub>Aeq</sub> (1 hr)	The LAeq noise level for a one-hour period. It represents the highest tenth percentile hourly A- weighted Leq during the period 7 am to 10 pm, or 10 pm to 7 am, (whichever is relevant).
L <sub>Aeq</sub> (15 hr)	The LAeq noise level for the period 7 am to 10 pm. (Day and Evening)
L <sub>Aeq</sub> (9 hr)	The LAeq noise level for the period 10 pm to 7 am. (Night)
L <sub>Aeq</sub> (Time)	Equivalent sound pressure level: the steady sound level that, over a specified period of time, would produce the same energy equivalence as the fluctuating sound level actually occurring. This is considered to represent ambient noise.
L <sub>AMax</sub> (Time)	The maximum sound level recorded during a specified time interval.
L <sub>AMin</sub> (Time)	The minimum sound level recorded during a specified time interval.
L <sub>AN</sub>	Statistical sound measurement recorded on the "A" weighted scale.
L <sub>LF</sub>	Low frequency noise level in the frequency range 20 Hz to 200 Hz.
L <sub>N</sub>	Statistical sound measurement recorded on the linear scale.
М	Million or mega
m	Metre
m AHD	Meters Australian Height Datum
m BGL	Metres below ground level
m/d	Metres per day
m/s	Metres per second
m <sup>2</sup>	Square metres
m <sup>3</sup>	Cubic metres
m <sup>3</sup> /h	Cubic metres per hour
m³/s	Cubic metres per second
m³/y	Cubic metres per year
Mbcm	Million bank cubic metres
mcg	Micrograms (10 <sup>-6</sup> grams)
Meq/100g	Milliequivalent per 100 grams

mg	Milligram (10 <sup>-3</sup> grams)
mg/kg	Milligrams per kilogram
mg/L	Milligrams per litre
μ <b>g</b> /m <sup>3</sup>	Micrograms per cubic metre
ML	Million litres or megalitre
ML/a	Mega-litres per annum
ML/yr	Megalitres per year
μm	Micrometres
mm	Millimeter
mm/day	Millimetres per day
mm/s	Millimetres per second
Mm <sup>3</sup>	Million cubic metres
Mm <sup>3</sup>	Million cubic metres
Mt	Million tonnes
Mtpa	Million tonnes per annum
MW	Megawatt
MWh	Megawatt hours
NTU	Nephelometric Turbidity units
PJ	Petajoule
ppm	Parts per million
SiO2	Silicon Dioxide
t	Tonnes
t/h	Tonnes per hour
t/m <sup>3</sup>	Tonnes per cubic metre
tpa	Tonnes per annum
tph	Tonnes per hour
uS/cm	Micro siemens per centimetre (used in electrical conductivity measurements)
yr	Year
µg/L	Micrograms per litre
µg/m <sup>3</sup>	Micrograms per cubic metre
μm	Micrometres
µS/cm	Microsiemens per centimetre
