31.1 Figure References

All Hancock Galilee Pty Ltd EIS and Technical Report/Appendices Figures will have used any combination/or all of the datasets listed below to compile the maps/figures and extract data for the project.

Metadata for all licensed datasets can be obtained from URS or the respective websites for the Federal (<http://www.environment.gov.au/metadataexplorer/explorer.jsp> , https://www.ga.gov.au/products/servlet/controller?event=DEFINE_PRODUCTS, <http://www.osdm.gov.au/>) and Queensland government (<http://dds.information.qld.gov.au/dds/>)

Typically a dataset has been listed and can appear in one or all the maps presented in this EIS in any number of combinations with other listed relevant datasets pertaining to the mapping requirements for a particular chapter in assessment. As such the obligations, permissions, copyrights and disclaimers for any and/or all of the datasets listed in the table below apply to all the Figures compiled by URS on behalf of Hancock Galilee Pty Ltd.

Consultants or Sub-consultants engaged by Hancock Galilee Pty Ltd or URS have sourced and listed their datasets and material for their compiled Figures in their Technical Reports. Consultants or Sub-consultants that have been engaged for the Kevin's Corner EIS have been listed below. The Consultants or Sub-consultants data may have been used to compile Figures in the Kevin's Corner EIS, therefore their sourced datasets, obligations, permissions, copyrights and disclaimers for any and/or all of their data will be applicable and can be sourced/referenced in their Technical Report.

Not all Figures/Diagrams/Plates that have been used in the EIS and Appendices have been compiled by URS on behalf of Hancock Galilee Pty Ltd and/or any of their Contractors or Sub-contractors. As such the sourcing for these particular Figures/Diagrams/Plates have been included in the text and/or listed in the reference section of the Technical Reports or in Volume 1, Section 31.

GENERAL DATASETS		
Hancock Galilee Pty Ltd	Description	Data supplied by Hancock Galilee Pty Ltd
	Source	Coal Mine Infrastructure, Railway Line Infrastructure, Aerial Photography, etc from Hancock Galilee Pty Ltd and Consultants or Sub Consultants engaged by Hancock Galilee Pty Ltd. See list detailed below.
	Copyright	© Copyright Hancock Galilee Pty Ltd and various licensed datasets as listed below.
	Disclaimer	The contents of this EIS are for information only to enable the assessment of the Alpha Coal Project. To the maximum extent permitted by law, we exclude completely all liability to any person for loss or damage of any kind (however caused, including by negligence) arising from or relating in any way from the material which appears in this EIS. We reserve all copyright in the content of the material which appears in this EIS. We do not make any representation or warranty that the material which appears in this EIS is accurate or complete and we are under no obligation to notify any person or provide any further information to any person if we become aware of any inaccuracy, incompleteness or change in the material in this EIS.
URS	Description	Project Wide, Coal Mine and Related Infrastructure Assessment data

DERM	Description	Good Quality Agricultural Land
	Source	QLD DERM
	Copyright	© The State of Queensland (Department of Environment and Resource Management) 2009
	Constraint	The dataset contains land resource information at varying scales (1:1,000,000 to 1:10,000) and each polygon has been attributed with scale and source of the base information. It is recommended that information is used at a scale that is applicable within the boundaries of an individual local authority or a broad landscape view. Use of the information outside these scales can be sorted by contacting the content manager of the information. This data was created by the Department of Natural Resources and Water and is subject to Queensland Government copyright. Reference to the data source to be provided on all products produced.
	Disclaimer	While every care is taken to ensure the accuracy of this information, the Department of Natural Resources and Water makes no representations or warranties about its accuracy, reliability, completeness or suitability for any particular purpose and disclaims all responsibility and all liability (including without limitation, liability in negligence) for all expenses, losses, damages (including indirect or consequential damage) and costs which might be incurred as a result of the information being inaccurate or incomplete in any way and for any reason.

ABS	Description	Statistical Local Area Digital Boundaries (ASGC 2006)
	Source	Australian Bureau of Statistics - http://www.abs.gov.au/AUSSTATS/abs@.nsf/DetailsPage/1259.0.30.0022006?OpenDocument
	Copyright	© Copyright Commonwealth of Australia 2009
	Disclaimer	All data and other material produced by the Australian Bureau of Statistics (ABS) constitutes Commonwealth copyright administered by the ABS. The ABS reserves the right to set out the terms and conditions for the use of such material.
ABS	Description	Population Density Data
	Source	Australian Bureau of Statistics website (Web pages for the 3 areas downloaded - Last updated 08-02-2008) http://www.censusdata.abs.gov.au/ABSNavigation/prenav/LocationMap?ReadForm&prenavtabname=Location%20Map&&navmapdisplayed=true&textversion=false&collection=Census&period=2006&producttype=&method=&productlabel=&breadcrumb=L&topic=&
	Copyright	© Copyright Commonwealth of Australia & PSMA Australia 2007
	Disclaimer	MapStats are thematic maps which provide Census statistics for larger geographies. Statistics available include population counts, ethnicity, education, family, income, labour force and dwelling characteristics. Thematic maps are maps which display selected information relating to specific themes (e.g. population density). Differences in the selected characteristics across the regions on the map are shown using various shades of colour. Census data are particularly popular for these types of maps as a wide range of characteristics is available for small areas. Note: A thematic map which has a large number of boundaries will be more meaningful, as you will be able to see the distribution of data across a number of areas.
