B.2. Mapping

All Hancock Galilee Pty Ltd SEIS and Technical Report/Appendices Figures will have used any combination/or all of the datasets listed below to compile the maps/figures and extract data for the project.

Metadata for all licensed datasets can be obtained from URS or the respective websites for the Federal and Queensland Governments.

(<http://www.environment.gov.au/metadataexplorer/explorer.jsp>, https://www.ga.gov.au/products/servlet/controller?event=DEFINE_PRODUCTS, <http://www.osdm.gov.au/>), (<http://dds.information.qld.gov.au/dds/>)

Typically a dataset has been listed and can appear in one or all the maps presented in this SEIS in any number of combinations with other listed relevant datasets pertaining to the mapping requirements for a particular chapter in assessment. As such the obligations, permissions, copyrights and disclaimers for any and/or all of the datasets listed in the table below apply to all the Figures compiled by URS on behalf of Hancock Galilee Pty Ltd.

Consultants or Sub-consultants engaged by Hancock Galilee Pty Ltd or URS have sourced and listed their datasets and material for their compiled Figures in their Technical Reports. Consultants or Sub-consultants that have been engaged for the Kevin's Corner SEIS have been listed below. The Consultants or Sub-consultants data may have been used to compile Figures in the Kevin's Corner SEIS, therefore their sourced datasets, obligations, permissions, copyrights and disclaimers for any and/or all of their data will be applicable and can be sourced/referenced in their Technical Report.

Not all Figures/Diagrams/Plates that have been used in the SEIS and Appendices have been compiled by URS on behalf of Hancock Galilee Pty Ltd and/or any of their Contractors or Sub-contractors. As such the sourcing for these particular Figures/Diagrams/Plates have been included in the text and/or listed in the reference section of the Technical Reports or in Volume 1, Section 31.

	Disclaimer	<p>MapStats are thematic maps which provide Census statistics for larger geographies. Statistics available include population counts, ethnicity, education, family, income, labour force and dwelling characteristics.</p> <p>Thematic maps are maps which display selected information relating to specific themes (e.g. population density). Differences in the selected characteristics across the regions on the map are shown using various shades of colour. Census data are particularly popular for these types of maps as a wide range of characteristics is available for small areas.</p> <p>Note: A thematic map which has a large number of boundaries will be more meaningful, as you will be able to see the distribution of data across a number of areas.</p>
